**Q6–**

A. Governments are grappling with how to regulate content without infringing on freedom of expression.

B. While this democratization of news has empowered marginalized voices, it has also raised concerns about misinformation.

C. The rise of citizen journalism has challenged traditional media narratives by offering grassroots perspectives on unfolding events.

D. Media watchdogs now advocate for digital literacy and fact-checking protocols to maintain credibility.

E. Social platforms have enabled real-time reporting, often bypassing editorial filters and gatekeeping.

**Q8 –**

A. Major brands are now publishing supply chain audits and investing in biodegradable materials.

B. The global fashion industry is undergoing a sustainability reckoning as consumers demand ethical sourcing and transparency.

C. Independent watchdogs have begun rating companies based on verifiable environmental impact metrics.

D. These ratings are influencing purchasing decisions, especially among younger, eco-conscious demographics.

E. However, critics argue that many initiatives amount to greenwashing rather than systemic reform.

**Q9 –**

A. Government schemes are now focusing on expanding broadband infrastructure and training local health workers.
B. Clinics now offer virtual consultations, digital prescriptions, and remote monitoring for chronic conditions.
C. The pandemic accelerated the adoption of telemedicine, reshaping how patients access routine healthcare.
D. While urban areas adapted quickly, rural regions faced challenges due to limited internet connectivity.
E. Experts believe that hybrid care models will define the future of primary healthcare delivery.

**Q10–**

A. The rise of generative AI tools has sparked debate over authorship and intellectual property in creative industries.
B. Artists and writers argue that training models on copyrighted content without consent undermines original work.
C. Tech companies maintain that datasets are curated from publicly available sources and fall under fair use.
D. Legal scholars suggest that new frameworks are needed to balance innovation with creator rights.
E. Until then, courts continue to grapple with lawsuits that could set precedent for future AI regulation.

**Q11 –**

A. Traditional meat producers are now investing in hybrid models to stay competitive in a shifting market.

B. Nutritionists caution that not all substitutes are equally healthy, urging clearer labeling and regulation.

C. As consumer demand grows, startups are racing to develop products that mimic taste and texture without animal ingredients.

D. Governments are beginning to fund research into long-term health impacts and agricultural transitions.

E. The rise of plant-based meat alternatives has sparked a global conversation about sustainability and food ethics.

**Q12 –**

A. The city's ambitious smart traffic system aims to reduce congestion through AI-driven signal coordination.

B. Sensors embedded in roads and intersections collect real-time data on vehicle flow and pedestrian movement.

C. This data is processed to adjust signal timings dynamically, minimizing wait times and fuel consumption.

D. Initial trials have shown a 20% improvement in commute efficiency during peak hours.

E. Urban planners hope to expand the system to include emergency vehicle prioritization and pollution tracking.

**Q13 –**

A. The recent art biennale featured installations that explored themes of displacement and cultural memory.

B. One exhibit recreated refugee shelters using salvaged materials and immersive soundscapes.

C. Visitors were encouraged to reflect on the emotional toll of forced migration through guided narratives.

D. The curators collaborated with displaced communities to ensure authenticity and ethical representation.

E. Critics praised the event for blending aesthetic innovation with social commentary.

**Q14 –**

A. The fintech app's gamified savings model rewards users for meeting financial goals with virtual badges and cashback.
B. Behavioral economists suggest that such incentives can improve long-term money habits, especially among younger users.
C. The app also offers personalized budgeting tips based on spending patterns and income levels.
D. User reviews highlight its intuitive interface and the motivational impact of goal tracking.
E. Developers plan to introduce community challenges and peer comparisons in future updates.
